“Above and Beyond - Refining Your Skills in Diabetes Education”

Seminar Overview

Ready to explore new concepts in diabetes care and management? Then consider attending this all day program that synthesizes exciting findings and new elements that you can incorporate into your daily practice.

Through dynamic presentations and case studies, we will provide you with creative strategies to take your practice to the next level in today’s fast paced health care environment.

In addition, small group activities allow participants to network and share problem solving strategies.

The goal of this program is to provide cutting-edge information that has real life application.

We want each participant to leave the seminar feeling more empowered and confident advocating for excellence in diabetes care.

Learning outcomes:

The goal of this program is to provide cutting-edge information that has real life application.

We want each participant to leave the seminar feeling more empowered and confident advocating for excellence in diabetes care. Through dynamic presentations and case studies, we will provide you with creative strategies to take your practice to the next level in today’s fast paced health care environment. In addition, small group activities allow participants to network and share problem solving strategies.
