

# Diabetes 2020 | Getting to the Heart of Diabetes Care

## Join us Live!

Each session airs from 8:30 am—10:00 a.m. PST

The COVID Pandemic is taking a toll on people with diabetes. What is the critical information Diabetes Care and Education Specialists need as we navigate this pandemic? How can we take a leadership role in providing sound recommendations while helping to manage the full range of diabetes issues, including: hypertension, hyperlipidemia and cardiovascular risk reduction?

Coach Beverly has created this four-session virtual course so that participants can delve deep into the topics that are most pressing for diabetes care now and in the future. We will focus on improving population health and then drill down to individual intervention through case studies. We will discuss implementing cardiovascular risk screening and treatment in the clinical setting and more!

**Who Should Attend?** This course is designed to provide critical, cutting-edge information for health care professionals who are caring for people with diabetes or aspire to.

- ◇ **Session 1 - Getting to the Heart of Care - 1.5 CEs - Airs April 23rd**
