

## ***“Diabetes in the 21st Century”***

***Thursday, July 1st, 2021***

***8:00AM - 4:00PM***

***VIRTUAL Class Participation (7.5 CEU’s)***

### **Course Description**

This exciting course is intended to provide you with the helpful tools in managing patients with diabetes. Diabetes care will be presented through a dynamic presentation with case studies and strategies to succeed in today’s fast paced world. This course will also include updates on the latest advances in diabetes care and critical elements of diabetes management , prevention, and education. Our goal is to provide as many diabetes clinical “pearls” as possible, so participants leave the webinar with practical approaches to educate their patients and feel more empowered when advocating for excellence in diabetes care.

### **Learning Objectives:**

- Describe the impact of diabetes in the U.S.
- Discuss diabetes prevention and management strategies.
- Differentiate the different types of diabetes
- Describe effective insulin therapy strategies
- Gain understanding of type 2 diabetes medication regimens
- Review glucose patterns and determine appropriate adjustments to therapy for better glycemic control
- Describe basics of carb counting
- Discuss healthy G.I . Flora and healthy eating
- Demonstrate successful teaching techniques

### **Presenter**

**Beverly Thmassian RN, MPH, CDCES, BC-ADM**– Beverly is a nurse entrepreneur, educator and clinician with a passion to improve diabetes care. She has a special knack of translating complex diabetes information into relatable terms that can be immediately applied in the clinical setting . She also believes that learning diabetes should be meaningful and fun, so participants leave feeling re-energized and excited about diabetes care.
