

Level 2 | Standards of Care Intensive | 20+ CEs

Our Level 2 Courses break down the ADA Standards of Care into knowledge nuggets that highlight the critical content needed for clinical practice and exam success. You can choose to view the courses in the same order as the Standards as indicated by class number. Or you can navigate your own path, starting with the content you are least familiar with, then moving forward into the topics that you have the greatest knowledge.

These **13 courses** are handpicked by Coach Beverly to inform your clinical practice and increase the breadth of knowledge across the lifespan and care continuum. We delve into special populations, pharmacologic management, hospitalization, and more.

Course List
