

Thank you for purchasing the 6<sup>th</sup> Ed of the Art and Science Desk Reference by ADCES.

As with most new textbooks, errors are discovered as readers pour through the pages. The ADCES has sent us a list of discovered errors as detailed below. They will be providing us with complete page updates that we will post on our website soon as they are available. Please email us with any questions at [info@diabetesed.net](mailto:info@diabetesed.net).

Thank you in advance for your patience and understanding,  
Coach Beverly, Bryanna and Andrew

### Diabetes Care and Education 6<sup>th</sup> Edition Print Errors

**Front matter:** pages iii, xv, xiii (correction: forward to **foreward**)

**Chapter 1:** page 2, col 1, the second sentence after the bulleted list should read **Type 2 diabetes is the most common form of diabetes.**

**Chapter 20:**

- **Figure 20.1:** "T6" which shows up in several places should be "TG".
- On p 631, under Pregnancy, Precautions, and Contraindications, "Statins are **contraindicated** in pregnancy" changed to "statins are **not recommended** in pregnancy."
- **Figure 20.2:**  
Health Behaviors Management +
  - **BP ≤ 20/10 mm Hg above target: One preferred anti-HTN agent**
  - **BP >20/10 mmHg above target: Two preferred anti-HTN agents from complementary drug classes"**

The fourth box from the top should read:

- "At target BP **and** therapy **tolerated:** continue therapy
- Not meeting BP target: Add preferred anti-HTN agent from complementary **drug** class
- Adverse effects: consider change to alternative preferred anti-HTN agent
- If not meeting BP target or adverse effect using drugs from each **of 3** preferred anti-HTN classes, consider addition of **mineralocorticoid receptor antagonist"**

Footer should read:

- **"\*Preferred in albuminuria (UACR ≥ 30 mg/g)**
- **\*\*Dihydropyridine calcium channel blocker**
- **\*\*\*Long-acting thiazide diuretics shown to reduce CVD events, such as indapamide or chlorthalidone, are preferred"**
