Stelo: Personalized Choices, Revolutionizing Glucose Health

Dexcom set the standard in CGM innovation for 20 years and counting. Now introducing Stelo, the first FDA-cleared OTC glucose biosensor, designed to empower your patients with prediabetes or type 2 diabetes not on insulin to reach their goals.

Learn all about Stelo: personalizing choices, revolutionizing glucose health

Tracking glucose in the easiest way

No prescription. No fingersticks.*
No hassle.

*If the sensor readings are not consistent with the symptoms, a blood glucose meter may be an option as needed.

Providing personalized insights to empower your patients

Built with all the features your patients need and nothing they don't.

Leveraging nonstop innovation that puts glucose goals within reach

Innovation is always included.
Brought to you by Dexcom.
