

Diabetes Certification for Pharmacists: Step-by-Step

Co-Presented by Beverly Thomassian, RN, MPH, BC-ADM, CDCES
 President, Diabetes Education Services
 Diana Isaacs, PharmD, BC-ADM, BCACP, CDCES, FADCES, FCCP
 Endocrinology Clinical Pharmacy Specialist, Cleveland Clinic

Land Acknowledgment

▶ We acknowledge and are mindful that Diabetes Education Services stands on lands that were originally occupied by the first people of this area, the Mechoopda, and we recognize their distinctive spiritual relationship with this land, the flora, the fauna, and the waters that run through this area.

Free webinar
Diabetes Certification for Pharmacists
 Learn how you can achieve CDCES or BC-ADM certification & advance your expertise!
 Airs Feb. 19th, 2026 at 11:30 am PST

OUR SPEAKERS
 Dr. Diana Isaacs, PharmD, BCPS, BC-ADM, BCACP, CDCES, FADCES, FCCP
 Endocrine Clinical Pharmacy Specialist, Director, Education & Training in Diabetes Tech

COACH BEVERLY THOMASSIAN, RN, MPH, CDCES, BC-ADM
 Founder and CEO, Diabetes Education Services

- ▶ A clear comparison of CDCES vs. BC-ADM and which pathway fits your role and goals.
- ▶ Step-by-step guidance on eligibility, hours, application, and exam prep.
- ▶ Strategies to build confidence in achieving diabetes certification.
- ▶ Insights on how certification can expand your scope and career options.
- ▶ A behind-the-scenes look at how our resources and online university supports pharmacists from start to certification.

What is a Certified Diabetes Care and Education Specialist?

A Certified Diabetes Care and Education Specialist (CDCES) - formerly known as a CDE - is a healthcare professional who possesses comprehensive knowledge of and experience in diabetes prevention, prediabetes, and diabetes management. A CDCES educates, supports, and advocates for people affected by diabetes, addressing the stages of diabetes throughout the lifespan. A CDCES promotes self-management to achieve individualized behavioral and treatment goals that reduce risks and optimize health outcomes. CDCESs have passed a rigorous exam to show they have this specialized knowledge.

What is Board Certified in Advanced Diabetes Management?

The Board Certified in Advanced Diabetes Management (BC-ADM) credential recognizes advanced expertise in diabetes management for licensed healthcare professionals such as dietitians, nurses, pharmacists, and physician assistants. It signifies proficiency in areas like medication management, including insulin adjustment, interpreting diagnostic tests, developing individualized care plans, and managing complex diabetes cases.

BC-ADM-certified professionals provide advanced, evidence-based care to improve outcomes for individuals with diabetes. Certification requires a minimum of 500 clinical practice hours, a valid license, and is maintained through continuing education or re-examination every five years.

<https://www.sarahhormachea.com/>

CDCES vs BC-ADM

CDCES

- Supports and educates people with prediabetes and diabetes to understand and self-manage
- Individualize behavior and treatment goals to optimize health outcomes.

BC-ADM

- Requires Master's degree
- Management of diabetes and comorbidities
- Increased complexity of decision making

CDCES vs BC-ADM

Showcase your Expertise In Diabetes Care, Education, and Management
Initial Certification

	CDCES	BC-ADM
Overview	 CDCES educate and support people affected by diabetes. They help people and their families: <ul style="list-style-type: none"> • Understand and manage the condition • Achieve behavioral and treatment goals • Optimize health outcomes 	 BC-ADM holders manage complex patient needs: <ul style="list-style-type: none"> • Assist people at risk for and with diabetes and other cardiometabolic conditions with therapeutic problem-solving • Adjust/prescribe medications • Treat and monitor acute and chronic complications and other comorbidities • Counsel on lifestyle modifications • Address psychosocial issues • Participate in research and mentoring *Note: See discipline's scope of practice and licensure
Qualifying Disciplines	Registered & Advanced Practice Registered Nurse Registered Dietitian/Registered Dietitian Nutritionist (RD/RDN) Pharmacist PA Physician (MD/DO) And others (see website or handbook)	Registered & Advanced Practice Registered Nurses Registered Dietitian/Registered Dietitian Nutritionist (RD/RDN) Pharmacist PA Physician (MD/DO)

Diabetes Education SERVICES 25 CDCES & BC-ADM EXAM REQUIREMENTS

Requirement	CDCES Exam	BC-ADM Exam
Education	n/a	Master's or higher degree in a clinically relevant area
Experience	<ul style="list-style-type: none"> 2 years of general work experience 1000 hours of diabetes care and education in up to 5 years, with 200 hours in last 12 months 	500 hours of clinical practice in advanced clinical diabetes management in up to 48 months (clinical hours must be earned after advanced degree obtained)
Continuing Education	15 hours applicable to diabetes within 2 years before applying	n/a
Exam Structure	175 multiple-choice items, includes 25 pre-test, unscored items. Time to test: 4 hours.	175 multiple-choice items, includes 25 pre-test, unscored items. Time to test: 3-1/2 hours.
Major Exam Content Areas (# of Questions)	<ul style="list-style-type: none"> Assessment (37) Care and Education Intervention (105) Standards and Practices (8) 	<ul style="list-style-type: none"> Assessment and Diagnosis (45) Planning and Intervention (50) Evaluation and Follow-Up (34) Population Health, Advocacy, and Professional Development (21)

True or False Questions

- ▶ CDCES is comprised of 200 multiple choice and true and false question?
- ▶ **BC-ADM exam is comprised of 175 multiple choice questions?**
- ▶ Both exams require a brief essay of explanation at the end?

Coach Bev's Journey

Achieving Certification

1992 – Passed CDCES Exam, Health Education Mgr at HMO
 1994 – Hired as Inpatient Diabetes Specialist at Stanford Hospital
 1998 – Started consulting company Diabetes Education Services to help health care professionals achieve certification
 1998 - current: Run local diabetes programs inpatient, outpt, HIS clinic
 2001 – Passed BC-ADM exam
 Keep expanding knowledge

Maintaining Certifications

CDCES Exam – Sit for exam every 5 years to be familiar with exam philosophy.

- ▶ Have passed exam 7 times, sit for 8th time in 2027
- ▶ Renew through CEs or Exam

BC-ADM Exam – Sat for exam twice, then policy changed.

- ▶ Renew every 5 years by completing:
 - ▶ CE activities (75 CE's)
 - ▶ Academic Credits
 - ▶ Presentations
 - ▶ Publication & Research
 - ▶ Preceptor / Mentor
 - ▶ Professional Service

Coach Bev's Recent Roles

Hospital Based Program Manager

- Inpatient diabetes management
- ADA recognized outpatient program
- Outcome measurement
- Training of staff
- Policies and procedures
- Teach classes
- Write articles

Rural Clinic Diabetes Specialist

- Consultant to providers and colleagues
- Cardiovascular risk management
- Work on process improvement
- Starting support group
- Staff training
- Medication adjustments
- Case management

Diana Isaacs and her Certification Journey

Learn More About Diana Isaacs

"Diana Isaacs, PharmD, BCPS, BC-ADM, BCACP, CDCES, FADCES, FCCP is an Endocrinology Clinical Pharmacy Specialist. She serves as the Co-Director of Endocrine Disorders in Pregnancy and the Director of Education and Training in Diabetes Technology at the Cleveland Clinic Endocrinology and Metabolism Institute.

Dr. Isaacs holds board certifications in pharmacotherapy, ambulatory care, and advanced diabetes management. She served on the American Diabetes Association (ADA) Professional Practice Committee from 2020-2023, the committee that updates the ADA Standards of Care. She also was the ADA Communications Director for the Pregnancy and Reproductive Health Interest Group from 2018-2022. She has been actively involved with the American Association of Clinical Endocrinology (AACE) and currently serves on the leadership of the Diabetes Disease State Network."

Diana Isaacs, PharmD, BCPS, BC-ADM, BCACP, CDCES, FADCES, FCCP, Endocrinology Clinical Pharmacy Specialist

Diana Isaacs Diabetes Journey

Achieving Certification & Beyond

- 2009 - Graduated pharmacy school, SIUE
- 2010 - Pharmacy Residency with Ambulatory care focus at the Philadelphia VA
- 2011- Worked in a Primary Care Clinic within the VA System, started gaining diabetes hours to sit for exam
- 2013- Passed BC-ADM exam
- 2014- Passed CDCES exam
- 2016 - Joined Cleveland Clinic, became CGM Program coordinator, then co-director of endocrine disorders in pregnancy and now Director of Education & Training in Diabetes Technology
- 2017- Became President of Ohio ADCES, started speaking more nationally, joined several ADCES and ADA Committees
- 2019- Awarded ADCES Diabetes Care and Education Specialist of the Year
- 2019- Started getting invited to different speaker's bureaus for diabetes tech and pharma companies

- 2020-Joined Beverly Thomassian's team and presented at the Diabetes Ed conferences
- 2020-2023, ADA Professional Practice Committee (updates Standards of Care)
- 2022. Started podcast, "Diabetes Dialogue"
- 2022. Inaugurated into SIUE Alumni Hall of Fame for contributions to diabetes care
- 2021-2024: ADCES Board of Directors
- 2026-current: AACE Board of Directors

Maintaining Certifications

- CDCES Exam** - Renewed once by CE credits and more recently by retaking the exam
- BC-ADM Exam** - Renewed twice, was audited once. ©

Diana's Recent Roles

Endocrine Clinical Pharmacy Specialist

- Prescriber role
- Management of T1D, T2D, GDM
- Introduce people to diabetes tech
- Train on pumps and adjust settings
- Treat and prevent CV and CKM complications
- Precept residents, students

Professional Organizations

- Speaker: APHA, ASHP, ACCP, ADA, ADCES
- Committees: Education, Research, Conference Planning, Disease State Network, PRN's, Board of Directors
- Guideline writing: Pregnancy, Diabetes Technology, Standards of Care-ADA, AAACE Clinical Practice Guideline Oversight

Consulting

- Advisory boards: ketone monitoring, CGM, hypercortisolism, connected pens, insulin pumps
- Non-profits: Diatribe, Diabetes Sisters, T1D Exchange, Beyond Type 1
- Speaker's Bureaus

How to Get Your Clinical Hours

1 Document your clinical hours providing diabetes care

- Counseling people with diabetes.
- Helping with discharge planning.
- Med reconciliation

2 Volunteer in Community Health Programs or Diabetes Camp

Local diabetes prevention or management programs, such as YMCA's Diabetes Prevention Program, Diabetes Camps, Health Fairs

3 Join ADCES

Get involved in your state coordinated body or Local Networking Diabetes Groups. Networking with DCE's and pharmacists in your area can lead to opportunities to gain hours and possible future employment.

4 Join Diabetes Support Groups

Facilitate or assist with support groups in person or online to provide guidance and share educational resources.

5 Help with managing Diabetes Technology

- Help with even train other healthcare professionals about aspects of diabetes management.

Tyler's Journey to Gain his CDCES/BC-ADM

I did it because I wanted to show my value. Pharmacists are often told we need to 'prove' our worth since we don't typically generate revenue, and being an expert in a specialty adds another layer. I'm actively putting in the work to give more than just drug facts. I want to help the whole disease state and the person at the center—not just manage medications and stop there. It's comprehensive care, and certifications like CDCES and BC-ADM allow me to be comprehensive on multiple fronts."

-Tyler Whitaker, Pharm.D., BC-ADM, CDCES

My original job description wasn't directly related to diabetes management.

Tyler Whitaker, Pharm. D., BC-ADM, CDCES

"I started in outpatient case management, doing medication review, education, and cost savings as a single touch pharmacist while nurses handled the rest. But as our team became more proactive in diabetes care and CGM use increased, my role naturally expanded from being the 'drug guy' to helping with technology, interpretation, and ongoing support for patients.

When other team members left, and the telephonic diabetes management program risked falling apart, I decided, best I could, to wear all the hats I could rather than let it collapse. Nearly two years later, it's just myself and a consistent health coach managing adults in our health system who choose to engage with us. We've had great outcomes and so much attention that the health system is actively trying to duplicate the model and have a Tyler in every office."

Articles to Read to Prepare for BC-ADM Exam

ADA Standards of Care 2026 – This yearly publication by the American Diabetes Association outlines the national goals of care based on the latest research for diabetes management. This is one of the most important guidelines to read as a Certified Diabetes Care and Education Specialist:

- Purchase a copy of the ADA Standards of Care 2026 book
- Purchase a copy of the ADA Standards of Care 2026 book
- Summary of Evidence: Standards of Care in Diabetes 2026 – The 2026 Standards of Care includes revisions to incorporate person-first and inclusive language. Efforts were made to consistently apply terminology that empowers people with diabetes and respects the individual at the center of diabetes care.

Pharmacologic Approaches to Glycemic Treatment in 2026 – This ADA/ASD hyperglycemia read map details strategies to improve glucose management for both Type 1 and Type 2 Diabetes. Section 9 of *Standards of Care 2026*.

Coach Beverly's Diabetes Cheat Sheets – Our Diabetes Cheat Sheet page is brimming with useful information for your clinical practice and exam success. We update these sheets at the beginning of each year, based on the ADA Standards of Care and the latest evidence. Our cheat sheets cover topics such as:

- Costly Referrals, Tests & Exam Study Sheets
- Medication Pocketcards
- Diabetes Tech Resources
- Nutrition Information
- Person-Centered Coaching
- Teaching Sheets for People with Diabetes
- Diabetes Apps

A few highlights

1. **Screening and Diagnosis of Diabetes Mellitus 2026** – One-page cheat sheet that summarizes screening, risk status, and diagnostic criteria for diabetes. Great for your office and as a study tool.
2. **Med Cheat Sheets | Cholesterol and Hypertension Medications 2026** – These summary sheets are helpful for your clinical practice and preparing for certification exams. For exam success, be familiar with the general concepts, side effects and precautions of these medications.
3. **Landmark Studies** – A short cheat sheet that highlights the major diabetes trials and the significant findings.

Language & Diabetes: What we say matters | Resource page

Language is powerful and can have a strong impact on perceptions as well as behavior. This mini webinar and article provide recommendations for the language used by health care professionals and others when discussing diabetes through spoken or written words whether directed to people with diabetes, colleagues, or the general public, as well as research questions related to language and diabetes.

ADCS 7 Self-Care Behaviors – a must-read for anyone entering the field of diabetes or as a reference for those already in the field. These 7 Self-Care Behaviors™ provide a framework for patient-centered diabetes self-management education and training (DSE/EMT) and care.

CDCES and BC-ADM Exam Philosophy

The certification exams include which of the following philosophies?

- Motivate people to achieve compliance
- Empower individuals to improve diabetes self-management
- Consider individuals needs, goals and life experiences
- Help all people with diabetes achieve an A1C less than 7%
- Collaborate and provide ongoing care

Getting Ready Exams

- ▶ **Filling gaps in Foundational Knowledge**
- ▶ Resources for exam prep for the CDCES exam typically provide foundational information, e.g. national standards, medication use and teaching skills.
- ▶ While they are not the focus of the BC-ADM® exam, foundational knowledge is helpful for meeting some of the content listed in the exam content outline.
- ▶ **Filling gaps in advanced management knowledge**
- ▶ Knowing the American Diabetes Association's Standards of Care in Diabetes and other guidelines for management of diabetes and other comorbidities is critical.
- ▶ Regional activities updating primary care providers in diabetes are also good sources for reviewing current practice standards.
- ▶ You can search online to see if any specific continuing education activities are available on topics of interest.

Handbook

Suggested Study Steps

1. Do a self-evaluation of current knowledge and skills in advanced diabetes management to identify any gaps.

2. Determine how to best fill those gaps in knowledge.

- ▶ The BC-ADM® exam measures both foundational knowledge such as interviewing and teaching techniques, but the major focus is on
- ▶ clinical management: physical assessment, pharmacology, complications, and comorbidities.

Sample Question 1

- ▶ A healthy adolescent with 2 year history of type 1 DM returns for a quarterly appt. For the past month, they have experienced abdominal pain and diarrhea after some high carb meals. An advanced diabetes manager's first intervention is to order a:
 - A. 72-hour fecal fat collection
 - B. Transglutaminase Autoantibody Test
 - C. Colonoscopy
 - D. Stool Sample

Sample question 2

- ▶ A 54-yr-old, BMI 32 with type 2 diabetes, A1c 8.3%, history of HTN with a UACR of 38mg/g and GFR of 49. Meds include Glipizide, Metformin and levothyroxine. Given his risk status, which 3 classes of meds should they be taking according to ADA Standards?
 - a. ARB, statin, SGLT-2 Inhibitor
 - b. Insulin, aspirin and ACE Inhibitor.
 - c. TZD, ARB and bolus insulin.
 - d. Beta blocker, stop metformin and add statin.

Test Taking Tips

- ▶ Try not overanalyze or “read into” a question. Questions are not written to be tricky.
- ▶ Avoid adding in additional information beyond what is given in the test question. All information necessary to answer the question will be given in the text of the question or scenario.
- ▶ Remember that this is an international test. The questions will be based upon an accepted knowledge base. Choose options that you know to be correct in any setting.
- ▶ When guessing, use the process of elimination. Treat each option as a true or false statement and eliminate those that you would not select.
- ▶ Budget your time. 3.5 hours to complete 175 questions.
- ▶ Skip difficult questions and come back to them later. Questions on the test are not ordered by difficulty (i.e., they do not go from easiest to hardest).
- ▶ Also, content areas (the domains) and topics are addressed randomly in questions throughout the test

Study Tools – Take as many tests as possible Test Taking Tips Free Webinar

Test Taking Practice Exam Toolkit | Webinar + 220 Sample Practice Test Questions
\$ 49.00
Quantity - 1 +
Add to Cart

Quantity Discount	Discount
Buy 3+	15% Off

- On-Demand course, reviews a sampling of the questions and explains how to dissect the question, eliminate the wrong answers and avoid getting lured in by juicy answers.
- 220 questions in total divided into Four 50+ computerized quizzes. These quizzes include clinical practice exam questions that provide vignette-style situations and
- other critical content that will prepare you for the actual exam.

Managing Test Anxiety

- ▶ Measures to reduce your stress during the examination.
- ▶ Deep-breathing techniques and be sure to stretch your muscles periodically to reduce both physical and mental stress.
- ▶ If necessary, take a few minutes to imagine a calm, pleasant scene, and repeat positive phrases.
- ▶ Eat well, avoid too much alcohol, and maintain a regular sleep pattern for several days before the examination to help you to be physically prepared.
- ▶ Also, on the day before you take the test, collect all the supplies you will need and choose comfortable clothing.
