

★ Diabetes in the 21st Century

Seminar Overview

Are you interested in teaching your patients about diabetes, but find it difficult to keep pace with the latest advances in diabetes care? Then consider attending this all day program that synthesizes the critical elements of diabetes care and education.

Through dynamic presentations and case studies, we will provide you with creative strategies to succeed at teaching in today's fast paced health care environment. In addition, small group activities allow participants to improve clinical confidence and diabetes problem solving skills.

Our goal when developing this seminar was to include as many diabetes clinical "pearls" as possible, so participants leave the seminar feeling more empowered and confident advocating for excellence in diabetes care.

Who Should Attend? ★

This course is designed for all health care professionals including providers, nurses, dietitians, pharmacists and educators who want to:

- Get re-energized about diabetes care and education
- Enjoy a comprehensive and reality based review of "the basics and beyond" of diabetes management.
- Keep abreast of the rapidly changing strategies in diabetes management
- Refine their skills and improve competencies in diabetes problem solving.
- Learn practical approaches to educating patients about diabetes self-management.

★ Course Faculty: Beverly Thomassian, RN, MPH, CDE, BC-ADM

Beverly is a nurse entrepreneur, educator and clinician with a passion to improve diabetes care. She has a special knack of translating complex diabetes information into understandable terms that can be immediately applied in the clinical setting. She also believes that learning about diabetes should be meaningful and fun so participants leave feeling re-energized and excited about diabetes education.
