Which part of days two/three was most useful to you?

Day two was very useful, behavioral change is important vs, hard to learn alone & reading at home.

Do you have any additional suggestions or ideas that may help us improve day two and three?

add an extra day and add behavioral change in the afternoon at each day for a few hours and provide more time for case management and to no rush program is overall

everyone was great and awesome to learn from. Some of the content is harder to learn but a lot of time seemed spent on stuff we already knew or was common sense. Healthy eating and behavior change could have been shorter and more time spent on insulin. Also how to eat was packed full of stats and studies but it was too much packed in and not much retained. reinforcing

What did you think about the length of day two? Too short X About Right Too long

What did you think about the length of day three? Too short About Right Too long

Which part of days two/three was most useful to you? a.m. of Day 2 was my favorite

Do you have any additional suggestions or ideas that may help us improve day two and three?

a.m. insulin info and case studies. Great help

Thank you very much for your dedication to diabetes education and care.
