SERVICES

Bev's Perspective

- ▶ First took exam in 2001 (before kids)
- ▶ Strong background in inpt management
- ▶ Passed test – but opened another professional door – expanded my perspective, encouraged learning
- ▶ Created Critical Assessment Course as result
- ▶ Member of team that provided “Review Course” for ANCC in mid 2000s
- ▶ Retook exam in 2006
- ▶ Renewed by completing a bunch of stuff - 2011
- ▶ Declined to participate in committee to update exam in 2011 (although I really wanted to)

Diabetes Education
SERVICES

Current Role

- ▶ Diabetes Program Manager
 - Inpatient diabetes management
 - ADA Recognized Outpt Program
 - Outcome Measurement
 - Training of Staff
 - Policies and Procedures
 - Medication Adjustment Suggestion
 - Teach Classes
 - Write articles

SERVICES

Poll Question 2

- Mrs. S is having trouble sleeping and complains of waking up with frequent nightmares. Her insulin dose includes 5-8 units of Novolog at breakfast and dinner and 12 units of NPH bedtime. She complains that her before bed blood sugar is often greater than 300, so she takes extra insulin before going to bed to bring it down. What is your best response?
- Instruct patient to decrease the NPH insulin by 2 units to prevent nocturnal hypoglycemia.
 - Contact provider and request to discontinue NPH and start Lantus instead.
 - Assess if the patient is having a snack before checking her bedtime blood glucose level.
 - Encourage pt to adjust her dinner time Novolog to prevent hyperglycemia at bedtime.

Diabetes Education
SERVICES

Poll Question 3

- The American Diabetes Association recommends universal screening for at risk pregnancies as soon as possible after the confirmation of pregnancy. Criteria for high risk include:
- glycosuria, obese, > 25 years of age, strong family history of diabetes
 - the same risk factors for type 2 as listed in the ADA standards of medical care.
 - Obese, >35 years of age, member of high-risk ethnic group, strong family history of diabetes.
 - Glycosuria, > 25 years of age, member of high-risk ethnic group, strong family history of diabetes

Diabetes Education
SERVICES

Poll Question 4

- Hyperglycemia during hospitalization is associated with poor outcomes due to
- Decreased insulin resistance, increased insulin secretion and increased counterregulatory hormones.
 - Increased free fatty acids, ketones, lactate, inflammatory cytokines.
 - Increased nitric oxide levels
 - Increased risk of alkalosis

Diabetes Education
SERVICES

A 40-year-old female patient has a 10-year history of diabetes #5

- ▶ The pt injects 16 units of NPH and 8 units lispro (Humalog) before breakfast, and 8 units of NPH, and 4 units of lispro (Humalog) before dinner. BG pattern is:
 - ▶ fasting blood glucose is 100
 - ▶ pre-lunch is 240 mg/dL;
 - ▶ pre-dinner is 210 mg/dL
 - ▶ bedtime is 150 mg/dL.

The advanced diabetes manager recommends:

- a. Adding 2 units of Humalog before breakfast.
- b. Adding 4 units of Humalog before dinner.
- c. Adding 2 units of Humalog before lunch.
- d. Decreasing the evening NPH insulin by 2 units.

Diabetes Education
SERVICES

Sample Question 6

An advanced diabetes manager best facilitates the learning process for adults by:

- A. Administering pre and post tests
- B. Creating an environment in which the learner is an active participant.
- C. Delivering content using a standardized slide presentation
- D. Insisting upon full participation
