Professional Activities

Clinical

Initiated quality improvement projects to promote glucose control, conducted outcome studies, developed insulin management strategies, provided case management across inpatient and outpatient continuum.

Summary of Clinical Activities

As a diabetes nurse specialist for the past 20 years, I have provided diabetes education and case management for outpatient population in a HMO setting. In several hospital settings, I established inpatient goals of care and developed comprehensive program to attain goals. The program included measuring baseline blood glucose control, implementing standardized glucose management strategies and evaluating improvement. Finally, I achieved American Diabetes Association Recognition for several outpatient diabetes programs and am working on developing a comprehensive diabetes prevention program.

Professional Organizations

Memberships
