Diabetes Education Services offers a comprehensive library of CE-accredited online courses, certification prep bundles, live training events, and clinical reference tools — all designed to equip healthcare teams with the knowledge and skills to deliver exceptional diabetes care.

Accredited CE Courses for nurses, dietitians, pharmacists, providers, and diabetes educators across hospitals, clinics, and health systems nationwide.

Cost Savings Through Worksite Discounts

Professional development budgets go further when your team learns together. A flat **20% group discount** means more staff trained, more knowledge shared, and a stronger return on your education investment.

CE Credits and Certification Prep

Our courses provide continuing education hours accredited by **AMA PRA Category 1™, ACPE, ANCC, and CDR**, and are designed to prepare your staff for prestigious diabetes certifications such as the CDCES or BC-ADM.

Turnkey Solution with Support

We make it easy to get your team started — from enrollment to certificates, we've streamlined the process so you can focus on running your program. Our team is here to help along the way.

Evidence-Based, Up-to-Date Education

Give your team access to the latest diabetes care standards, clinical tools, and best practices—all delivered by nationally recognized diabetes experts. Our courses are continually updated, so your staff is always learning the most current approaches.

Flexible, Self-Paced Learning

Your employees can complete courses at their own pace, on their own schedule. This flexibility minimizes disruption to client care while ensuring everyone gains consistent, high-quality training.

Improve Outcomes

Well-trained staff feel more confident and deliver better care. By enhancing their diabetes knowledge and skills, your team can help reduce complications and improve care for people with diabetes.

Professional Growth and Retention

Offering high-quality education boosts morale and retention. Employees see your investment in their growth, which fosters loyalty, engagement, and a stronger workplace culture.

"I tell everyone that will listen that your study materials and webinars are the best out there." - DiabetesEd Graduate
